

GOAL PLANNING AND DEVELOPMENT OF LANDSCAPE ARCHITECTURE PROJECTS

ABOUT ME

My deep interest in the planning and development of spaces, especially outdoor ones, is one of the main driving forces behind my work. I believe that the organic nature of the natural world is a source of inspiration to be sought out, whether in the design of spaces or in the materials to be used.

My background in advertising and my experience as a graphic designer add significant value to my work as a landscape architect. They bring refinement to my critical eye and provide a foundation for the creative development of projects.

I am constantly seeking new knowledge. The world is always evolving. Therefore, the way we view and engage with it must always be kept up to date.
